

EM-6903 | Antenna, Vertical Whip

Description

The Electro-Metrics EM-6903 Vertical Whip Antenna is a collapsible whip antenna for use with receivers or spectrum analyzers. The antenna collapses to a small length for ease of packing and extends for use at VHF as well as UHF frequencies.

The EM-6903 antenna has a right angle (90 degree) BNC connector.

Specifications

Electrical

Frequency Range: VHF and UHF

Polarization: Linear, Vertical

Radiation Pattern: Omnidirectional

Impedance: Varies with length and frequency

50Ω, Nominal when adjusted to resonance.

Connector: BNC (Male) 90 Degree (**EM-6903**)

Mechanical

Antenna Type: Vertical Whip

Dimensions:

Minimum Length: 20.3 cm (8 in.)

Maximum Length: 152.4 cm (60 in.)

Color Options:

- Unfinished Metal

Specifications subject to change without notice, unless otherwise specified. Product is manufactured in Johnstown, NY, U.S.A.
