

EM-1612 | Multi-Mount

Description

The EM-1612 Multi-Mount is designed to be an all-in-one mounting solution for our rugged omni-directional antennas, EM-6841 and EM-6843 and whip antennas, EM-6500 and EM-6501. The mount can be applied to a standard ¼-20 tripod stud. The mount can also be mounted to any metal wall or vehicle roof using magnetic feet. Lastly, the mount can clamp onto a typical 2-3" pole. When using the magnetic feet or on a pole, the mount itself can pivot 90 degrees to allow for vertical or horizontal mounting of the antennas.

Mechanical

Dimensions:

Length: 16.5"

Width: 5.5" – 6.75"

Height: 3.3" – 6"

Mounting Options Available:

- Mounts to ¼-20 tripod
- Magnets supplied for mounting to metal surfaces
- Clamps to 2-3" pole

Antenna Solutions:

- Omni-Directional: EM-6841, 6843
- Whip Antenna: EM-6500, 6501

Color Options:

- Black (default)
- Custom colors available upon request
