

EM-6898 | Antenna, Vertical Whip

EM-6898

EM-6898-2

Description

EM Antennas' EM-6898 Vertical Whip Antenna is a collapsible whip antenna for use with receivers or spectrum analyzers.

The antenna collapses to a small length for ease of packing and extends for use at VHF as well as UHF frequencies.

The EM-6898 antenna has a right-angle (90-degree) Type 'N' connector.

The EM-6898-2 is available with a Straight Type 'N' Connector.

Specifications

Electrical

Frequency Range:	VHF and UHF
Polarization:	Linear, Vertical
Impedance:	Varies with length and frequency. 50Ω, Nominal when adjusted to resonance.
Radiation Pattern:	Omni-Directional
Connector:	EM-6898: Type 'N' (Male) 90 Degree EM-6898-2: Type 'N' (Male) Straight

Mechanical

Length:	Minimum: 20.3 cm (8 in.) Maximum: 152.4 cm (60 in.)
Antenna Type:	Vertical Whip
Color Options:	Unfinished Metal
